Patient: guru | Report ID: PT-6E9CEA | Date: 2026-10-24

==========

EXTENDED CLINICAL SUMMARY & RECOMMENDATIONS:

1. Glycemic Control: Fasting plasma glucose and glycated hemoglobin reflect stable cellular insulin sensitivity.
2. Renal & Hepatic Indices: Glomerular filtration markers remain unimpaired with normal BUN/Creatinine ratio.
3. Preventive Guidance: Maintain current dietary protocol, adequate hydration, and adherence to scheduled medicines.

VITACARE AI PLAIN-LANGUAGE INTERPRETATION:

This diagnostic report confirms healthy metabolic functioning. Your blood sugar and kidney filtration levels are in good health. No acute abnormalities or critical alarms were detected on this evaluation panel.

VERIFYING PHYSICIAN:

Dr. Michael Chen, MD

License # MED-942819

CHIEF MEDICAL OFFICER:

Dr. Robert Vance, MD, FACP

Board of Clinical Pathology
